# 1. Introduction

In Greece the pilot activities were conducted by two partner organisations, Reception and Identification Centre of the Ministry of Migration Policy, and DIMITRA Education & Consulting. Each partner organisation has had different responsibilities and both organisations are in close collaboration during the pilot phase. The role of each partner organisation is summarised below:

- 1. DIMITRA Education & Consulting:
  - had the overall supervision of pilot testing activities,
  - translate the Qualification Prototypes, Toolkit and Guidelines in Greek language,
  - prepared all material (presentation, agenda, seminar structure) for the training seminar concerning the QUASER Toolkit and guidelines,
  - provided facilitation to operators to fill in the tools of self-assessment,
  - implemented the national workshop for stakeholders,
  - collected feedback and analysed the evaluation questionnaires by both operators and stakeholders of pilot testing.

### 2. Reception and Identification Centre

- recruited operators, who participated both in training seminar and in pilot activities,
- · implemented the training seminar for both stakeholders and operators,
- was responsible to collect the completed tools by operators,
- was responsible to collect feedback and evaluation questionnaires by operators.

The main objective of this report is to present both the process of pilot testing in Greece and the feedback received during the pilot phase. This report is divided in two main parts:

- Part I. General description of pilot activities and information about participants.
- Part II. Pilot training approach and feedback received.

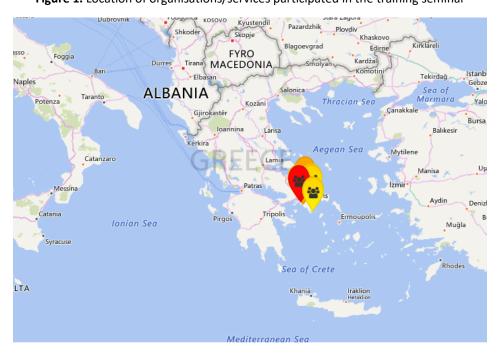

# 2. Pilot activities in Greece: General description of and information about participants

The pilot testing started with a training seminar addressed to asylum seekers and refugees (ASR) operators, which took place in 23rd of January 2019 in Athens (Greece). The main aim of this seminar was to introduce the QUASER qualification prototypes, Toolkit and Guidelines to their target group. In the seminar, a total of 13 ASR operators (8 officers, 3 professionals and 2 coordinators) from 6 organisations (5 ASR camps and 1 NGO) participated in the training seminar. The participant list including photographs is given in Annex 1, while the main characteristics of the organisations are given in Table 1 and the location is presented in Figure 1.

**Table 1.** Organisations/services and their capacity

Name of organisation	Capacity	Number of ASR hosted	Number of operator working
Schisto Refugee Camp	2000	Approx. 1100	23
Attiko Alsos Refugee	400	Approx. 110	8
Eleonas Refugee Camp	2500	Approx. 1680	32
Skaramagka Refugee Camp	3200	3224	34
Lavrio Refugee Camp	600	373	7
DRC NGO			

Figure 1. Location of organisations/services participated in the training seminar

The main services provided by operators are:

- To support the identification process.
- To provide health-related services.
- To support psychologically ASRs.
- To support integration process through a number of activities:
  - Greek language courses.
  - Events with local communities.
  - Cultural events including cooking, entertaining etc.
  - Creative activities for children.
- To improve living and hygienic conditions.
- To solve legal issues (e.g., application for asylum, identification etc.).

The main professionals occupied in the majority of the ASR camps are:

- Medical staff (general doctors, nurses, pediatrics, midwives, dentists etc.).
- Psychologists.
- Social workers.
- Mediators.
- Teachers.
- Staff for cleaning.

# 3. Pilot training approach and feedback received

The pilot activities were divided into three main phases:

- 1. Phase 1, where a face-to-face training seminar for the Toolkit and Guidelines took place and the tools were pilot tested
- 2. Phase 2, where a number of training seminar participants attended the QUASER e-learning course
- 3. Phase 3, where a number of stakeholder provided feedback about the QUASER outputs and especially for the Toolkit and Guidelines during a Multiplier Event that took place in Larissa (Greece).

#### The Phase 1 was structured as given below:

- 1. A presentation (Annex 2) was prepared by DIMITRA including all tools and steps/guidelines on how ASR operators could use them.
- 2. All tools including in the QUASER Toolkit, guidelines and Qualification Prototypes were disseminated to operators.
- 3. An extensive discussion on each tool and its implementation was conducted between seminar organisers and ASR operators. At the end of the training seminar, a questionnaire prepared by DIMITRA was filled in by all participants. The results of the evaluation questionnaire are given in Annex 3.
- 4. ASR operators had one month to fill in two different tools. "Personalised competence-based CV" was completed by all operators and one additional tool was selected by each operator:
  - a. 5 operators completed self interview
  - b. 3 Knowledge map
  - c. 3 Career portfolio
  - d. 2 Personal development plan

During tool completion process, a facilitator/trainer from DIMITRA was available to support ASR operators either via email or via telephone. "Personalised competence-based CV" was completed by all operators without any facilitation by experts. Facilitation was needed in "Knowledge map" and "Personal development map". At the end of the tool completion, a questionnaire prepared by UNITOV was filled in by all participants. The results of the questionnaire are given in Annex 4.

During Phase 2, eight operators attended the e-learning course, once they identified the Level that should attend. The level was identified through self-assessment tools in combination with the QUASER Qualification Prototypes. The transition from Phase 1 to Phase 2 is shown in Figure 2.

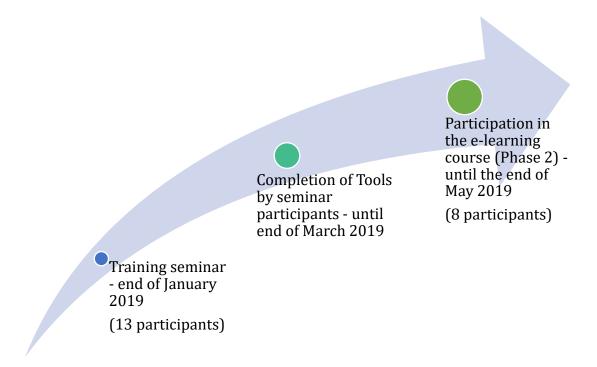

Figure 2. Outline of pilot testing process

All participants have completed an evaluation questionnaire prepared by UNITOV and translated in Greek language, where they provide feedback about the QUASER course. The results of evaluation questionnaire are presented in Annex 5.

The Phase 3 is an individual one, in which 25 stakeholders from ASR-related organisations/services provided feedback related to the QUASER outputs. The results of evaluation questionnaire are shown in Annex 6.

# Feedback on Qualification Prototypes (comments by participants)

- Very comprehensive and objective concerning knowledge, skills and competences required in each Level.
- Concerning ASR officer, the use of project management tools/ICT is not very important and useful in order to perform our daily duties. However, it is important an officer to

enhance his/her skills and competences in order to have the opportunity to improve job performance and the most relevant areas are negotiation, problem solving and decision making.

• I am not sure that the level of autonomy reflects the level of qualifications, as an operator usually has much many additional skills than those correspond to his/her job profile. In any case, during tools completion, I assessed only skills needed to my job position and I attend the correct level (I think).

### Feedback on Toolkit and Guidelines (comments by participants)

- Extremely useful tools for self-assessment process. It is easy to use one or two of them to assess the Level of qualifications.
- The toolkit is an innovative approach on self-assessment avoiding use of common test or similar tools.
- The majority of the participants declared that "personalised competence-based CV", selfinterview and mapping personal work areas can be used easy by individuals without any support by facilitators.
- Facilitation was needed in "Knowledge map" and "Personal development map" as ASR
  operators are not able to explain how to combine these tools with QUASER Prototypes.
- Concerning "Personal development plan", steps on how to fill in the tool and type of
  information are not clear to them. They would like to have more detailed guidelines.
- Two operators expressed their doubts on how the Toolkit could be useful without a follow up.

#### Feedback on training programme (comments by participants)

- Very interesting
- All operators declared that they enhance their knowledge in more than two units.
- They are interested to certified their skills and qualifications according to ISO
- Five operators have attended the EASO training activities and they were familiar with the majority of these issues.
- They declared that they did not spent many hours to understand the course content
- All participants are willing to recommend the course to their colleagues
- The ASR officers declared that they gained general knowledge on several issues.

- Lessons related to problem solving, decision making and negotiation are very useful for their job profile
- Lessons related to legal procedures and reception procedures are well-known to participants in a more detailed way.
- A lesson related to integration policies for labour market will be useful as many refugees are interested/willing to find a job.

# 4. Concluding remarks

The overall impression was for positive for the whole pilot testing procedures as well as feedback received for all QUASER outputs. The main conclusions are summarised below:

- Useful course for enhancing ASR operators' competences
- The QUASER Toolkit is very innovative approach and feedback received by both operators and stakeholders was very positive.
- The majority of tools could be used without any support by a facilitator, as the guidelines are clear, comprehensive and to the point.
- Some units of QUASER course (e.g., legal procedures and reception process) are covered in several training courses. These units are prerequisite in several organisations related to ASRs.

Finally, mapping of organisations participated in the QUASER pilot phase are provided in Annexes 7, 8, 9, 10 and 11.

- 5. Contact details

□ Tel.: 210 6928 921-2

☐ Email: x.bafoutsou@firstreception.gov.gr

6. Short description of the centre/structure (mission, activities, etc.):

The Open Centre in Attiko Alsos provides shelter to migrants in Greece who have registered with IOM Greece's Assisted Voluntary Return and Reintegration (AVRR) programmes and who have no place to stay until their departure.

It also offers placements for migrants with special needs, specifically single parent families, pregnant women, migrants with health needs (including a room for wheelchair users) and elderly.

The beneficiaries are accommodated in the Open Centre in dignity and with access to quality services (catered meals fulfilling the migrant's dietary needs, clothes, Wi-Fi, television, telephone cards, personal storage, cleaning services, 24-hour security services, psychosocial and medical services), for the time needed by their embassies to prepare their travel documents and for IOM to prepare for departure to respective country of origin.

#### **DIMENSIONS AND KEY CHARACTERISTICS OF THE STRUCTURE**

- 7. (Average) number of asylum seekers and refugees in the structure: 100
- 8. The "numbers" of the staff:

#### □ Coordinator:

- Profile/training and professional experiences:
  - -Xrisoula Bafoutsou has graduated from the department of Administration Economy, of the University of Technology.
  - 32 years total service as a civil servant.
  - a. 26 years service in the Ministry of Tourism, with salary recruiting duties.
  - b. 6 years service in the Ministry of Migration Policy, in the Reception and Identification Service (RIS), with wages clearances duties.

Several times between 2013-2016, alongside with the duties mentioned above, she was placed for long times as a Deputy Manager in the Reception and Identification Centers (RICs), in the Greek islands of Samos and Leros. Since 28/9/2018, she works in RIS as the Manager of the Open Center for Migrants in Attiko Alsos placed in Athens.
